

SEAM LOCATION GUIDELINES

- OUR TYPICAL FABRICS ARE MANUFACTURED IN 126" WIDE ROLLS
- TO GET A HIGHLY ACCURATE EDGE, OUR CNC REQUIRES AT LEAST 1" OF CUT-OFF ON EACH SIDE
- THAT LEAVES 124" OF USABLE FABRIC WIDTH
- THE HEIGHT OF THE STANDARD BOTTOM BAR AND THE STANDARD HOUSING HOUSING PROVIDE ROUGHLY 6" OF HEIGHT.
- SO, WHILE A SEAM MAY BE REQUIRED, IT WILL NOT BE VISIBLE UNTIL THE OVERALL UNIT HEIGHT EXCEEDS 130"
